You don't need to own the game, you just need to have it installed! All you have to do is run the game, click "play" to activate the trainer, then click "generate trainer". That's it! The trainer will launch, you will be asked to save your game to a predetermined location, and you will now be able to start your game from where you left off! Use the button on the trainer to pause or fast-forward! You can use the pause button to view the game's dialogues, notes, etc. You can use the fast-forward button to view the next few minutes of game. You can also exit the trainer at any time by pressing the "return" key. You will now be able to activate the trainer whenever you want to start playing! You must have .NET Framework 4.0 or higher installed in order to run the trainer. The trainer can run on any 32-bit version of Windows (XP, Vista, 7, 8, 8.1, 10), and on 64-bit versions of Windows (8, 8.1, 10) without having .NET Framework installed! Please note that the trainer doesn't modify the game in any way, and that it is 100% safe to use. The trainer uses the CryEngine SDK, which is included with the CryEngine3 base game and can be downloaded for free from The trainer was developed by an anonymous user. It was created based on their request and given the name "Crysis - v1.2.1 +11 Trainer" to show their gratitude. Thanks to: quade, JRK, dododot, MrFairy, and all the other users that helped in the creation of this trainer. [INSTALLATION] Simply unpack the file and run "Crysis-v1.2.1-11-Installer.exe". [USAGE] Select "Play" in the menu to start the game. Use the buttons on the trainer to pause, fast-forward, and view the game's dialogues, notes, etc. You can also exit the trainer at any time by pressing the "return" key. In the main menu, select "Options" and then the "Updater" tab. Select the "U" button to check if a newer version of the trainer is available. Select the "D" button to download the trainer. Select the "I" button to install 82157476af
